

Sprint 1 · Review pack

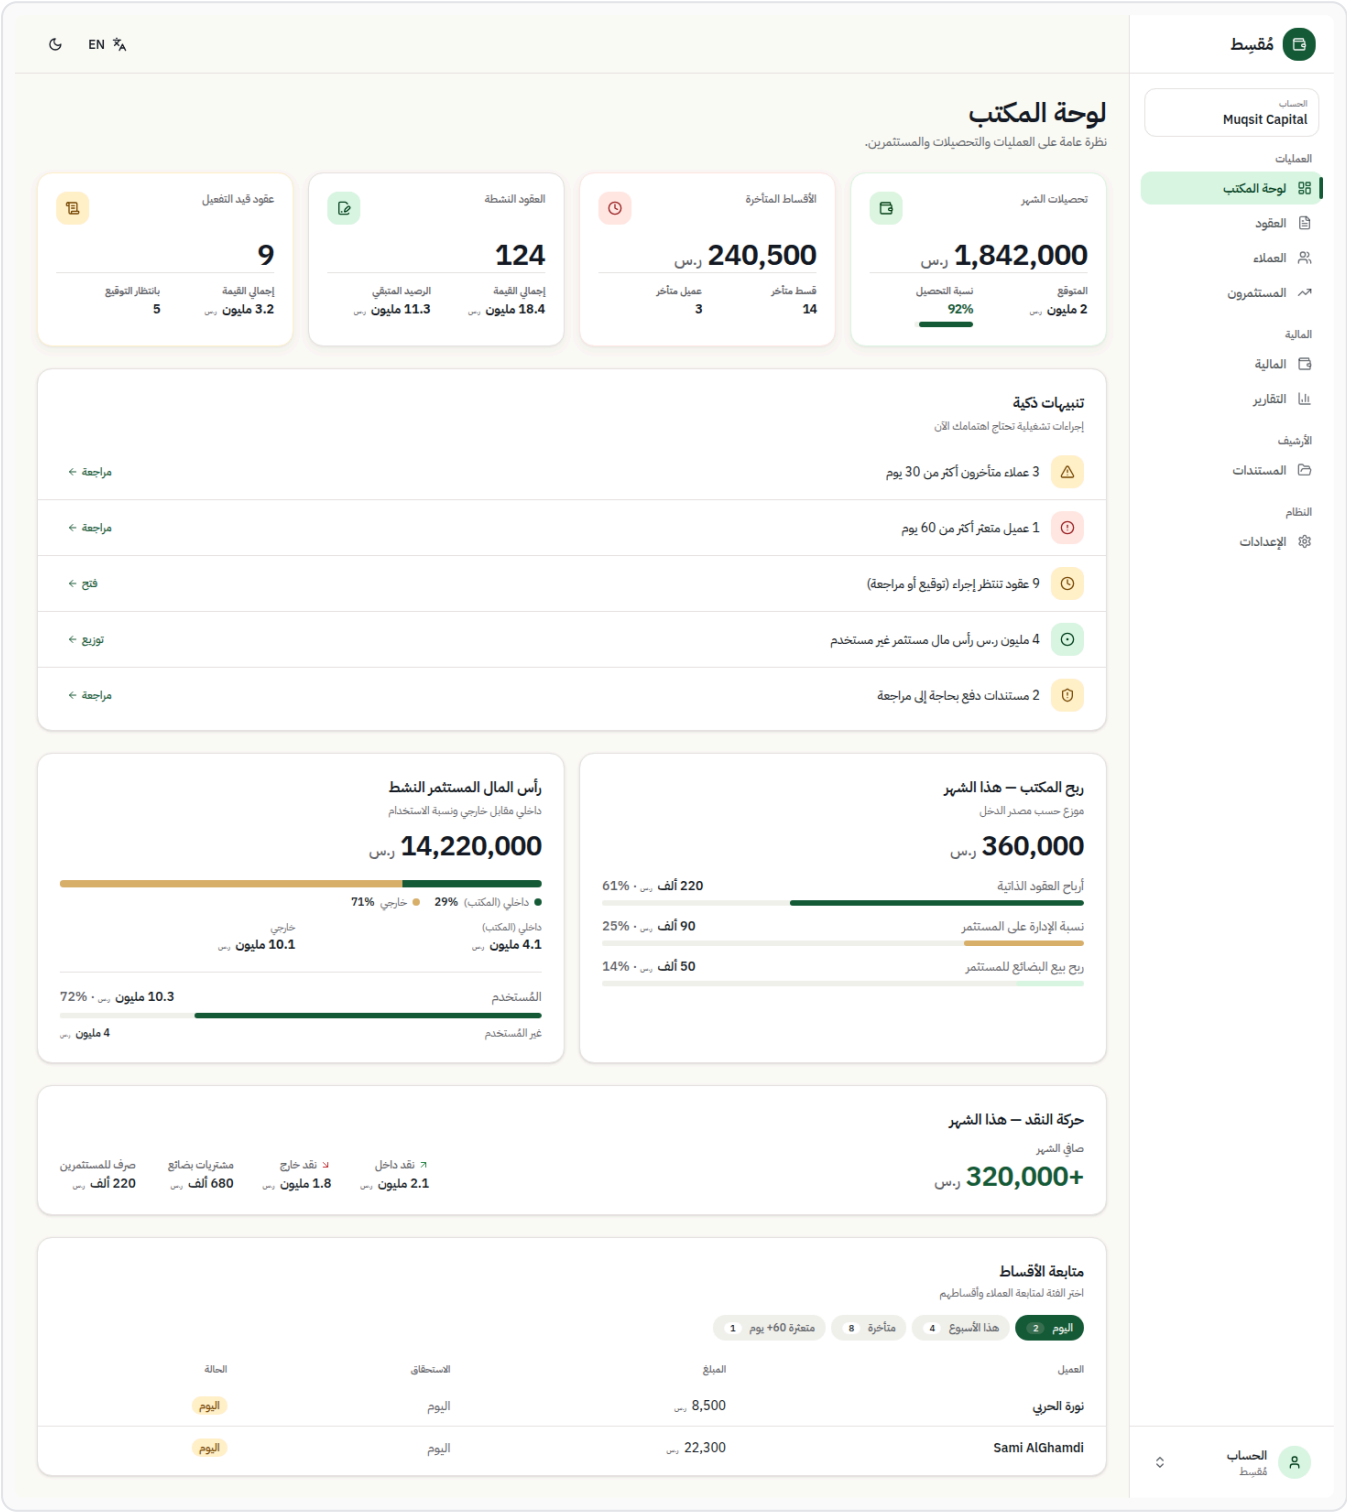

Office Dashboard v2

Operational dashboard for an installment-office owner.
Designed around collections, overdue follow-up, contracts, profitability and investor capital — no generic analytics, no charts beyond inline progress and split bars.

Branch	claude/dashboard-v2
Locale default	Arabic (RTL)
Theme default	Light · soft dark available
Mock data	Realistic Saudi installment-office figures (no backend, no API)
Deployment	None — review pack only

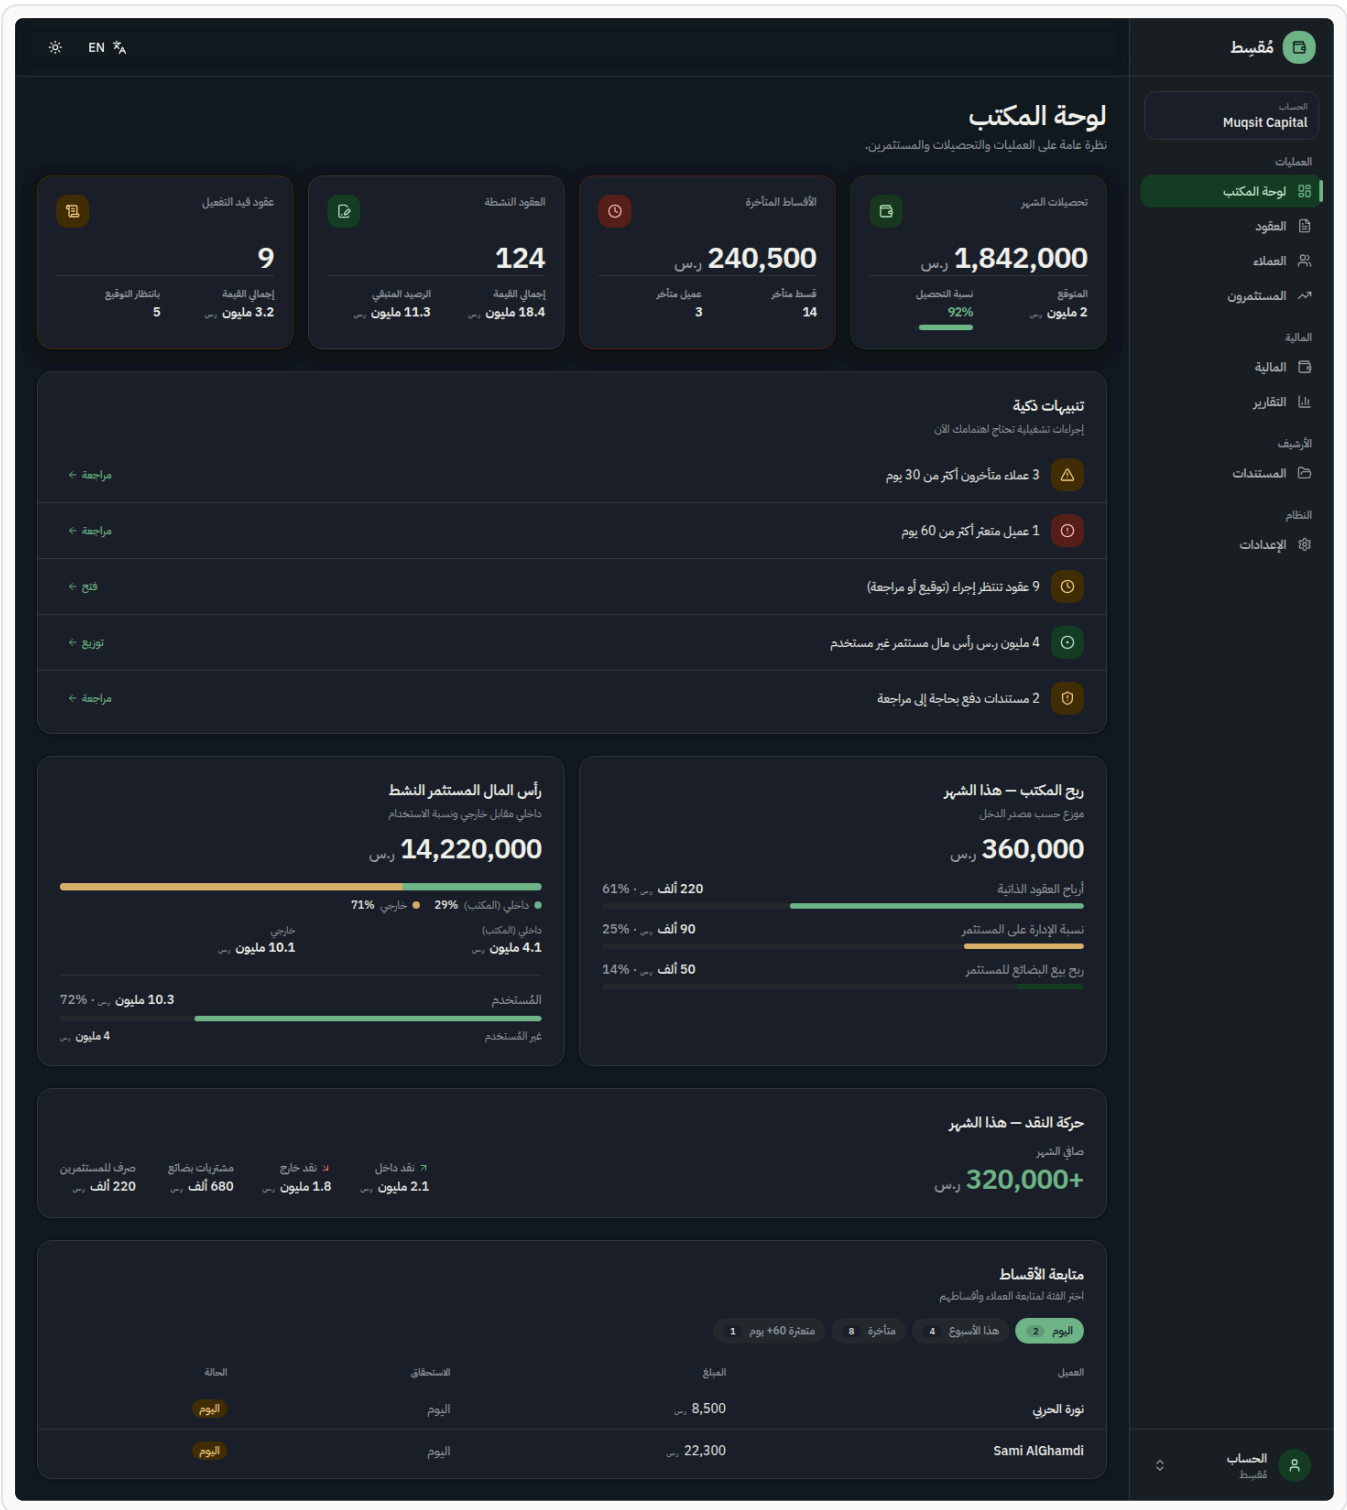

1 · Desktop · Arabic (RTL) · Light

The primary office view. Top row: Tier 1 KPIs — Collections this month (with expected and collection rate), Overdue installments (count and delayed customers), Active contracts (total value and remaining balance), and Pending contracts (value and awaiting signature). Smart alerts list five operational items linked to the relevant pages. Profitability splits the month into office-owned contracts, management % on investor operations, and margin from goods sold to investors. Active invested capital shows internal vs external with a split bar and utilization. Cash movement is a single compact strip. Installment follow-up tabs cover Today, This week, Overdue, and Defaulted 60+.

2 · Desktop · Arabic (RTL) · Dark

Same dashboard in soft dark mode. Background is a warm ink (never pitch black), the financial green stays as the identity colour, and status tones (success / warning / danger) remain readable at reduced saturation. Suitable for late-evening operations work without eye fatigue.

3 · Desktop · English (LTR) · Light

English mirror of the same dashboard. Sidebar moves to the left (LTR), KPI footers and split bars all flip with logical CSS properties. Useful for non-Arabic stakeholders reviewing the same data.

Light mode

4 · Mobile · Arabic (RTL) · Light

Mobile layout. Tier 1 KPIs collapse to a 2 × 2 grid that stays readable on small phones. Smart alerts become a single vertical list. Profitability and Utilization stack one above the other. Cash movement remains a single compact card. Installment follow-up tabs scroll horizontally if needed; the table is single-column friendly.

5 · Mobile · Arabic (RTL) · Dark

Mobile view in soft dark mode. Same layout principles as light mode — the warm-ink canvas keeps the green identity visible while reducing brightness for evening use.
